WOOLERY, ARLO, ed., *The Art of Valuation*, reviewed by Charles B. Warren, vol. 10, no. 3, 54.

Submitting Manuscripts to Growth and Change

Growth and Change welcomes manuscripts from scholars and professionals in all disciplines and specialties pertinent to regional development. Manuscripts which report the findings of original research having significance for public policy formation or those which describe and evaluate regional development programs are of particular interest. Contributors are encouraged to address not only scholars in their own fields but also scholars and professionals in other fields. Material of wide interest in regional development but which is not in the form of a scholarly research paper may be submitted for consideration by the Grapevine Editor.

Manuscripts are reviewed on the assumption that they are not under consideration elsewhere at the time they are being considered by *Growth and Change*. Prior to publication, authors will be asked (1) to certify that the work which the journal has offered to publish is original and unpublished and (2) to assign first publication and reprint rights to the journal.

Manuscripts of articles must be submitted in triplicate, typewritten on one side of the paper only, and at least double-spaced. Textual material should not exceed 3,500 words. *Growth and Change* uses the University of Chicago Press *Manual of Style* as its general guide. Our own Guidelines for Authors will be furnished on request.

All manuscripts considered for publication are reviewed by at least two outside referees. This sometimes occasions delays in the decision-making process which are beyond our control. With that exception, the processing of manuscripts is expeditious.

Please address manuscripts to:
